San Francisco County Partners with Runbeck Election Services for Vote-by-Mail Sorting Solutions

Tempe, Arizona [September 22, 2011] - Runbeck Election Services is proud to announce that The City and County of San Francisco, California has chosen the Agilis Ballot Sorting System™ to meet the county's need for a mail ballot sorting solution.

San Francisco County has approximately 466,000 registered voters, 143,306 (50.35%) of which voted by mail in the 2010 General Election. This compares to 91,926 voters who mailed ballots to the County during the 2010 Primary Election.

"We are excited to work with The City and County of San Francisco to provide what we feel is the best mail ballot processing solution on the market. The Agilis fills the need of election officials who are also required to be innovative when budgets are tight and the landscape of elections is changing at a rapid pace," said Runbeck Vice-President of Vote-by-Mail Solutions, Jeff Ellington.

The Agilis Ballot Sorting System™ provides election officials with a mail ballot sorting solution that is quick, easy and affordable. The Agilis is highly configurable and small, ideal for counties with limited space to roll it into and out of production and storage areas. Optional features include automatic signature verification software and in the near future, an inline envelope opener.

The City and County of San Francisco joins the City of Tucson, Arizona, and Adams and Larimer County, Colorado, to use the Agilis for mail ballot processing in the upcoming 2011 General Election this November.
